Weather Key Points

Regional Operations Center

Western Region

Sunday, February 5

- A storm system will continue to bring periods of rain and mountain snow to much of California through early Monday
 - Accumulating snow is expected above about 4000 feet across much of the state, with the heaviest accumulations in the Sierra. Significant travel impacts will continue.
 - Strong winds gusting generally 40-55 mph will continue across the mountains and across portions of southern California Sunday into Monday. Strong winds will produce near whiteout conditions at times in the mountains. Minor damage and travel impacts are also possible with these winds.
 - The chance of light rainfall at the lower elevations will also continue across much of the state Sunday, with no significant impacts expected, though isolated thunderstorms could produce brief, heavy rainfall
- Most of the state will remain dry for Monday through much of the work week
 - Light showers will be possible across far northern California Tuesday night and then again on Friday, with no significant impacts expected
 - Overnight and morning fog will be possible, especially in the Central Valley
- A couple rounds of Santa Ana winds will be possible across southern California, first on Tuesday, and then again on Thursday-Friday
 - Wind gusts of 30-40 mph will be most common, locally up to 50 mph

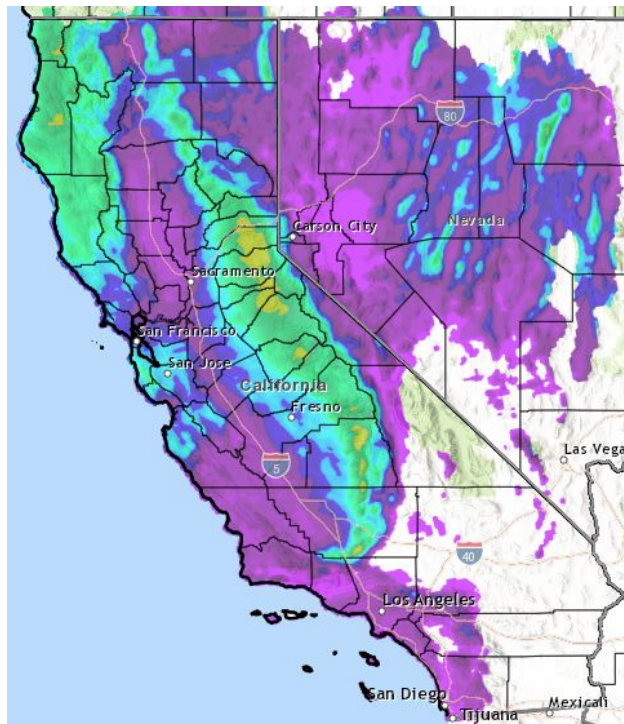

Daily Precipitation Forecast
